April 29, 2021

Below are the **3 required books** for the Community Herbalism Intensive (CHI) and the Weekend Herbal Program (WHP). The rest of the list includes a wide variety of books and websites that students may find useful. This is only a small smattering of books and resources. Many states, regions, and parks have their own plant identification books and plant lists.

I suggest scouring for used books online and in bookstores as good buys come and go quickly. While there are many places to find used books online, Amazon often has the best prices. If you have a human physiology textbook, it may come in handy.

In the realm of field guides and herbal medicine, editions are important. With some books, especially field guides, the newer editions are more up-to-date and easier to use. With older herbals, earlier editions may be useful. For books you are bringing into the field with you, a hardcover copy may last longer.

Required for Class-price range included as a rough estimate

1. *Plant Identification Terminology: An Illustrated Glossary*-Harris \$18
2. *Newcomb's Wildflower Field Guide*-Newcomb \$8 (paperback), \$16 (hardcover)
3. *Manual of the Vascular Plants of the Northeastern United States and Adjacent Canada*-2nd edition. Gleason and Cronquist \$70. Make sure you are purchasing this edition, not an earlier one.

Not required but very helpful

4. *The Illustrated Companion to Gleason and Cronquist's Manual*-Holmgren \$125

Books

Field and Nature Guides-Emphasis on Northeastern plants.

1. **Botany in a Day** 6th edition-Elpel
2. **Common Weeds of the United States**-USDA

Websites

Note-some of the below links are not currently working though you can just cut and paste the title in a search bar.

Herbal Medicine Information

1. [Henriette's Herbal Homepage](#)-many older herbal texts are on this site
2. [Herb Research Foundation](#)
3. [Jim McDonald Website](#)
4. [Kiva Rose's Blog](#)
5. [Michael Moore's Website](#)
6. [Sevensong](#) (Facebook page)

Plant Identification and Botany

Please note, many specific areas (i.e., Joshua Tree NP) have their own plant lists. To find them, search the name of the place plus plants (Plants of Joshua Tree NP). Look through the site and see if they have any pdfs or other links. Many National Parks have a separate and sometimes complete plant list. Below are a few of the websites I have found useful on my travels.

- [Alabama Plants](#)
- [Atlas of Florida Vascular Plants](#)
- [Calflora](#)
- [Common Plants of Saguaro National Park](#)
- [Flora of North America](#)
- [Flora of the Southeast](#)
- [Go Botany-Plants of New England](#) (most useful website for this class)
- [Missouri Plants](#)

- [New York State Flora Atlas](#)
- [USDA Plants of US Database](#)
- [Wayne's Word](#)
- [Wildflowers of the Southwest](#)

Organizations

[American Herbalists Guild](#)

[United Plant Savers](#)
